03 Response Plan

Quick Reference

inSIGHT ATMS generates a Response Plan when primary event details are saved for an event. You can access from the event details view Response tab or by right-clicking the **Event** icon on the Map GUI and selecting **Response Plan**.

		Eve	nt: U2	21118	0002	27					
	Event U22111800027										
	Own		Event	ID: U22	21118	300027			Dete	ected: 18:38

	26 N										

The system is configured to provide Response Plans to Dynamic Message Signs (DMS), Beacons, select Email recipients, and third-party consumers via API. Response Plans are generated automatically; they require review & approval before being activated. The icons in the response type tabs indicate status of the response plan: Reviewed and approved, Viewed but not approved, I Not reviewed.

DMS RESPONSE PLAN

The proposed DMS response plan creates messages only for nearby DMS, as per pre-configured rules.

				Select	Cancel

- 4. If required, click * to delete the proposed message, or click to view the DMS Properties window of the selected sign.
- 5.

- 5.1 If required, click **Add Sign** to add signs to the DMS response plan. Select signs from the list and choose a message from the DMS response message library.
- 5.2 If required, Add Sign from Map view. Click on **Show Map View**. Click on the selected Sign to add. Click **Add Sign to Plan**.

6. Click Accept to send the messages to the sign.

Email RESPONSE PLAN

The Email Response tab indicates the text of the Proposed Message to send via e-mail for the event, along with the Broadcast Groups to which the message will be sent, and the individual recipients that will receive it.
