07 Alerts

inSIGHT ATMS Alerts button is for missing persons and general alerts. These alerts send out warnings via DMS, Email and/or API.

MANAGEMENT

There are two types are Alerts that could be created: Missing Person Alert or General Alert.

Alerts menu:

To add an alert, right-click the **Alerts** button in the action panel appropriate alert type.

General Alert:

Use the **Primary Details** tab to fill in information about the alert. Note the cause, title and any description you wish to disseminate through response.

Missing Person:

Use the **Primary Details** tab to fill in information about the missing person, as well as the level of response. You can add details of a vehicle, last known location, the missing person's appearance, and any travelling companion. Vehicle models are mostly generic based on car body type.
